Konu: Efficiency Challenge Electric Vehicle Competition

Dear Sir/Madam,

The "Efficiency Challenge Electric Vehicle" is an annual competition for educational institutions organised by The Scientific and Technological Research Council of Turkey (TÜBİTAK) since 2005. The competition with the participation of international teams will take place on 06-12 August 2018, in Turkey.

The Challenge aims to emphasise the environmental sensitivity of students and creating environments that will enable the development of new technological advancements. For that reason, we encourage university students to produce the most efficient electric vehicle. As TÜBİTAK, we support participants from all over the world financially (15,000 TRY for international teams) and awards that amount up to 25,000 TRY in various categories will be given to teams. For more information participants can visit the official website: challenge.tubitak.gov.tr.

The Challenge is now open to registration for international teams. We kindly ask you to forward the enclosed poster to universities and other educational institutions providing higher education, particularly the engineering faculties.

Sincerely yours,

Bekir CENGELCI
Head of Science and Society Division
